Liner, Piston and Rings

Cummins Liner is made of special extra strong Nickel Chromium - Iron alloy and produced by centrifugal casting. The inner wall of the liner is coated with Lubrite for quick break-in and better resistance to wear and scuff.

Cummins Piston has a Ce-Corr finish, which allows the piston to retain a uniform oil film, and reduces piston-liner contact. The Barrel Grind on the piston skirt also lessens piston-liner scuffing.

Cummins Piston Ring set comprise key stoned top ring, high strength intermediate ring and Chrome faced oil control ring with excellent sealing capability.

All this means Genuine Cummins Liner, Piston and Rings work smoothly with perfect fit, **reduce wear & tear and minimize oil consumption, keeping your operational costs low and giving better life.**

Repair / Overhaul Kits

All parts you need for repairs / overhauls are available under one part number as a single lot. No possibility of errors while ordering. Being in a kit, all parts you need are available to you at one time. **Priced as a kit, they make your budgeting easier.**

Cummins constantly upgrades its technology and hence every component produced will have the latest.

Genuine Cummins Parts are designed and manufactured on the same production lines as the parts used in Cummins engines... and held to the same rigorous standards.

Genuine Cummins Part is equal to... or better than the original part.

Injectors

Every barrel and plunger in the Cummins Injector is individually matched to a perfect pair.

The injector cups are made from a very high quality hardened steel for maximum durability and precision. The spray holes in the injector cups are made with electronic discharge machine to ensure accurate spray pattern for **optimal engine**

performance and fuel economy.

You can count on Genuine Cummins Parts to exactly match performance, durability and reliability standards of your Cummins Engine, while incorporating all the latest design enhancements. Cummins knows how to keep your engine running at its best.

Bearings

Genuine Cummins Bearings are a combination of three metals: a steel backing for high strength with a copper-lead overlay and an indium-lead top layer to withstand dirt and marginal lubrication.

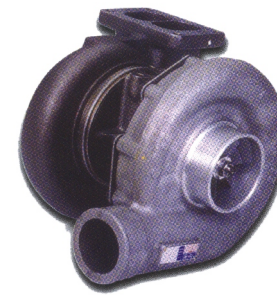

Result is enhanced durability and lower life cycle cost.

The risks of using non genuine parts are high. The best investment is not always the cheapest part. **Replacement parts for Cummins engines are not an expense, they are an Investment.**

Turbochargers

Turbocharger, rotating at nearly 1,00,000 RPM, is a highly critical component manufactured with specialized technology.

Exclusively designed for Cummins engine, Cummins supplied turbochargers are perfectly matched for individual engine application for optimized performance, **that means lowest running cost.**

Cummins Spares for Cummins Engines - Made for each other.

Maintenance Filters

Filters supplied by Cummins are made with advanced filtration media which keep impurities out of your engine avoiding abrasion and wear. **Running clean means running longer.**

Specially designed for 300 hours of change period, Lube oil and Fuel Filters offer you extended period between maintenance. **Save up to 20% on cost of lube oil and Filters,** apart from higher engine availability.

Cummins supplied Air Filters exclusively designed for Indian conditions, prevent dust entry and protect your engine. Air filter's outer element has a unique 'pleat-lock' design for increased durability and improved dust holding capacity. **Better durability and fewer filter changes save you on operational costs.**

**You own the best.
Repair with the best.**

The Cummins Advantage:

When you use genuine Cummins Parts and assemblies, you get years of trouble free operation. Most importantly, you get peace of mind. Only Cummins knows what a Cummins engine needs. With Cummins nationwide network , you are never far from a Cummins outlet. Cummins offers each customer a unique value package comprising Product, Information and Support. Working round the clock, around the country, Cummins support by committed and dedicated professionals is at your call.

So next time your Cummins engine needs any parts, use only Genuine Cummins Parts. They are easily available whenever you need them, wherever you need them.

**Invest in the Best,
Invest in the Genuine Cummins Parts.**
